Profile

I am a passionate and detail-oriented Frontend Web Developer with a strong foundation in creating dynamic and responsive web applications. With a solid understanding of modern HTML, CSS, and JavaScript frameworks, I have successfully developed and maintained various web projects that enhance user experience and meet business requirements. My commitment to continuous learning and problem-solving drives me to stay updated with the latest industry trends and best practices.

Projects

front-end developer at smart gate project

[github](#) [🔗](#)

As a Frontend Developer for the Smart Gate project, I played a crucial role in designing and implementing a user-friendly interface that streamlined the process of gate access management. My responsibilities included:

- **UI/UX Design:** Collaborated with the design team to create intuitive and visually appealing user interfaces, ensuring a seamless user experience.
- **Frontend Development:** Developed responsive and interactive web pages using HTML, CSS, and JavaScript, ensuring compatibility across various devices and browsers.

front-end developer at sigma star project

[github](#) [🔗](#)

As a Frontend Developer for the Sigma Star project, I was responsible for creating a dynamic and engaging user interface for a cutting-edge web application. My key contributions included:

- **UI/UX Implementation:** Partnered with designers to translate wireframes and mockups into functional, high-quality user interfaces, ensuring a seamless and intuitive user experience.
- **Responsive Design:** Developed responsive web pages using HTML, CSS, and JavaScript, ensuring compatibility and optimal performance across a range of devices and screen sizes.

front-end developer at shokran project

[github](#) [🔗](#)

As a Frontend Developer for the Shokran project, I was instrumental in crafting an engaging and user-friendly web application. My key responsibilities included:

- **UI/UX Implementation:** Collaborated with designers to convert wireframes and mockups into visually appealing and functional user interfaces, ensuring a seamless user experience.
- **Performance Optimization:** Implemented best practices for performance optimization, such as code splitting and asset optimization, to ensure fast load times and efficient resource usage.
